SHUFFLE

UNIVERSAL CAMERA
BRACKET
SOLUTION

SHUFFLE is a connected, modular approach to city hardware - with its plug-and-play rotatable modules that contain pre-certified hardware, it can be configured to suit your specific needs.

KEY ADVANTAGES

> **Robust design with high-quality finish**

> **Easy installation with patented mounting system**

> **Compatible with a wide range of PTZ cameras**

The SHUFFLE Camera Brackets are accessories that offer the possibility of integrating high-performing PTZ cameras into SHUFFLE columns. Created to complement the design of the SHUFFLE and enhance camera stability and safety, these versatile accessories can incorporate the majority of PTZ cameras available on the market.

These accessories were carefully designed to seamlessly integrate the SHUFFLE column with minimal disruption to the aesthetics and overall product design.

These accessories are built with the same high-grade materials — high-pressure, die-cast aluminium and gravity casting aluminium — with fasteners in stainless steel to ensure the same superior durability of the SHUFFLE.

They are then coated in a polyester powder paint that comes in a variety of colours to match the column identically and ensure a high-quality finish.
